WART Surgery Post - Operative Instructions

Some bleeding through the bandage is normal

Limit activity the day of the surgery- the area will be sore for a few days after the surgery

If you experience any discomfort, take aspirin or Tylenol as directed on bottle

The morning after surgery, remove the dressing/bandage. If the dressing/bandage sticks to the surgical area, soak in warm water – **Do Not Pull the bandage off**

Clean the area with Hydrogen Peroxide. Blot dry with a clean cloth. Apply betadine solution or anti-biotic ointment and cover with a band-aid

Change band-aid and anti-biotic ointment daily until your follow up appointment with the doctor

Please call our office if you have any questions or concerns
